Nonoi College initiated the "Safe Drinking Water Initiative" as a community outreach programme to provide clean and safe drinking water to the residents of Naharbari No. 3, a village in Kafitoli, Kondoli, Nagaon. The programme was designed to benefit approximately 25 villagers who previously relied on contaminated water sources, which historically led to waterborne diseases. In August and September 2025, a college team conducted a survey and worked with community leaders to identify a suitable location for the filter. The filter was built in September 2025 using local materials and with the help of student and villager volunteers. A training session led by Biswajit Keot at Naharbari No. 3 village aimed to ensure the sustainability of the Sand and Chip Water Filter system in Naharbari village. Village volunteers were trained in basic operation, routine maintenance, and proper hygiene practices for managing the filter, including regulating water flow and cleaning the filter bed. The programme concluded with a formal handover ceremony on October 16, 2025. The initiative is expected to improve health outcomes, empower the community through a sense of ownership, and provide a sustainable and cost-effective solution for clean drinking water, while also serving as a valuable learning experience for students. The programme served as a valuable service-learning experience for the students of Nonoi College, embodying the spirit of community service promoted by the college. The Principal, Dr. Mukut Moni Saikia of Nonoi College extends his gratitude to all the students, faculty, and staff who dedicated their time and effort to this project. He also thanks the village elders and the people of Naharbari No.3 for their enthusiastic cooperation and support, which was vital to the success of the programme..
